

Welcome to the Active Experimentation Project!

Your mission for today requires you to put to use all the lessons in creating engaging presentations in Powerpoint.

Instead of giving you specifications and a defined method to follow, given below are certain elements to be incorporated in your slideshow.

1. A three dimensional infographic. An example of such an infographic is attached below.

2. Motion Path Animation Effects
3. Transitions between each slide.
4. Horizontal Tabs: We've demonstrated vertical tabs in the lesson. For this presentation create these tabs horizontally instead.

Make use of any combination of Powerpoint tools to attain this output.
